FROM: XA00/Fritz Policelli

SUBJECT: Scientific Data Buy Project

REFERENCE: Contract NAS13-98048

NASA SSC interprets the data rights provisions of the Scientific Data Buy contract with Space Imaging for IKONOS data (Contract NAS13-98048) to permit reproduction of unlimited copies of the Product for controlled distribution only within the NASA affiliated research community and only for NASA research projects. The NASA affiliated research community is interpreted to include researchers who are employed by NASA, or who are conducting research with NASA under contract, grant, MOU or other formal agreement. NASA-affiliated researchers may use the Product only in connection with NASA projects on which they are working and are not allowed to make copies or distribute the Product for any other purpose or to researchers who are not affiliated with a NASA project. Recipients of IKONOS data procured through the Scientific Data Buy contract must maintain a record of each data set redistributed; the record must include the NASA affiliation of the researcher receiving the redistributed data. SSC requests a copy of the record be forwarded to the Scientific Data Buy Project Manager (fritz.policelli@ssc.nasa.gov) to assist in assessing project metrics. Furthermore, researchers who receive IKONOS data procured through the Scientific Data Buy contract must comply with all provisions of the End User License Agreement provided in the attached.
